DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 are drawn to a biochemical analysis unit comprising small and large mean pore diameters, classified in class 422, subclass 55.
- II. Claims 9-16 are drawn to a biochemical analysis unit comprising a large and small quantity of functional groups, classified in class 422, subclass 56.

The inventions are distinct, each from the other because of the following reasons:

1. Inventions of group I and II are patentably distinct. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects. The product of group I requires adsorptive regions provided with a layer that has pores having comparatively small and large mean pore diameters, which is not required of the product of group II. The product of group II requires an adsorptive region provided with a layer having comparatively large and small quantities of functional groups.
2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
3. A telephone call was made to Mr. Darryl Mexic on December 21, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1641

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
